

BENGALURU MAP

Kempe Gowda (1513-1569), the founder of Bengaluru was a feudatory of the Vijayanagara Empire. The town set up by him, originally called Bendakaluru (town of cooked beans) grew over time and came to be known as Bangalore under the British. His son Kempe Gowda II built four towers (D6, E6, G5, E4) in the cardinal directions to mark the boundaries of the city. He is also credited with having built over a hundred tanks and lakes as well as other monuments. Though today, Bengaluru has far outgrown even the vision of its founders, it still continues to draw inspiration from their far-sightedness.
